We would like to thank our producers, panelists and valuable guests who participated in our organization.

We are very happy to host you at the first TRT World Citizen Humanitarian Film Festival. We live in a time when the world is shaken by a new crisis every day. The weight of the troubles we face and the number of people affected by these negativities are increasing day by day. However, those of us who observe these challenges only from afar, need to remember that those affected by these events are not just statistical data or numbers. These are the lives of real people... These are people who share the same hopes and dreams as all of us. A safe place to live, a plate of food every day, a better life for children... Happiness, health, peace and security... These are just a few of the basic desires of every human being.

In times like these, we must remember the importance of finding a common humanity ground. Films as a means of expression offer a unique opportunity to create a common understanding between people living in different places from one end of the world to the other. Although impossible under other circumstances, thanks to the power of cinema, we are able to live the lives of others and experience their perspectives, even if, only for a moment. We can share ideas, hopes, joys and even pain. We believe that, thanks to this mutual understanding and experience, we can begin to build bridges between us and produce solutions to many problems we face as humanity. Turkey prioritizes humanitarian foreign policy for a fairer global system; It is a multidimensional, comprehensive and meaningful struggle on behalf of humanity. Our country has maintained the title of "the most generous country in the world", which it achieved as a result of humanitarian aid in various geographies, in 2021 as well. This is one of the most precious marks that a country will carry on its chest as a source of pride. Our President, Mr. Recep Tayyip Erdoğan, loudly reiterates the emphasis that "the world is bigger than five" at international meetings, and plays a critical role in the resolution of international crises under his leadership and intense diplomacy. Today, with the new global order debates intensifying, Turkey fills a great gap as the conscientious voice of the world - in discourse and action.

As the TRT family, we also have a responsibility to be the voice of the ignored and to show the invisible, with our unique perspective in our broadcasts and all our works. Because we know that change can occur primarily in people's minds, hearts and understandings.

The purpose of existence of TRT World Citizen Humanitarian Film Festival; is to create a platform to share the stories of individuals affected by the crisis and to make their voices and narratives visible. We hope that this festival will deepen our human ties, build our empathy, and strengthen our desire to bring about positive change in the world. The festival will help us remember how similar we ultimately are, rather than our differences.

Prof. Mehmet Zahid Sobaci
Director General, TRT
